

WORKSHOP

The MAC Protocol on the financing of high value mining,
agricultural and construction equipment:
Legal and economic benefits for
European States, international trade and development

Monday 14 October 14:30 – 17:00

Justus Lipsius Building (JL 50, Presidency room)
Council of the European Union,
Rue de la Loi 175, Brussels

The Finnish Presidency of the Council of the European Union, in partnership with the International Institute for the Unification of Private Law (UNIDROIT), is pleased to convene a Workshop to discuss the future fourth **Protocol to the Convention on International Interests in Mobile Equipment on Matters specific to Mining, Agricultural and Construction Equipment** (the "[MAC Protocol](#)").

The event aims at discussing with relevant experts and representatives of EU Member States the beneficial impact of the MAC Protocol. The conference will provide an opportunity for States to learn more about the future treaty in advance of its adoption at a **Diplomatic Conference in Pretoria, South Africa, between 11 - 22 November 2019**.

The workshop will begin at 14:30 on Monday 14 October 2019 with a welcome coffee.

Please **register** your participation **by 9 October** 2019 via the following link:
https://www.lyyti.in/MAC_Protocol_Workshop

Concept Note

Developed by the International Institute for the Unification of Private Law (UNIDROIT) over more than one decade, with participation of academic and other experts, governmental representatives, the European Union, specialised intergovernmental organisations as well as the relevant private sector, the **MAC Protocol** is currently under negotiations. It is an extension of the 2001 Convention on International Interests in Mobile Equipment (the Cape Town Convention), already adopted by 79 States and approved by the European Union for the matters within its competence. It will provide an international legal framework for the financing of high value **mining, agricultural and construction equipment**, increasing global investment and productivity in these key economic sectors.

Independent economic benefit studies show that European States will greatly benefit from the operation of the MAC Protocol, in the broader context of global development. The Protocol will foster exportations of MAC equipment as well as lower the cost of importations. It will allow financiers to extend credit in countries where they are currently unable to do so, or to finance at more favourable conditions.

The MAC Protocol will be negotiated at a Diplomatic Conference in Pretoria, South Africa, 11-22 November 2019.

Draft Agenda
